detail of curb, continuation of pattern for curb inside and outside

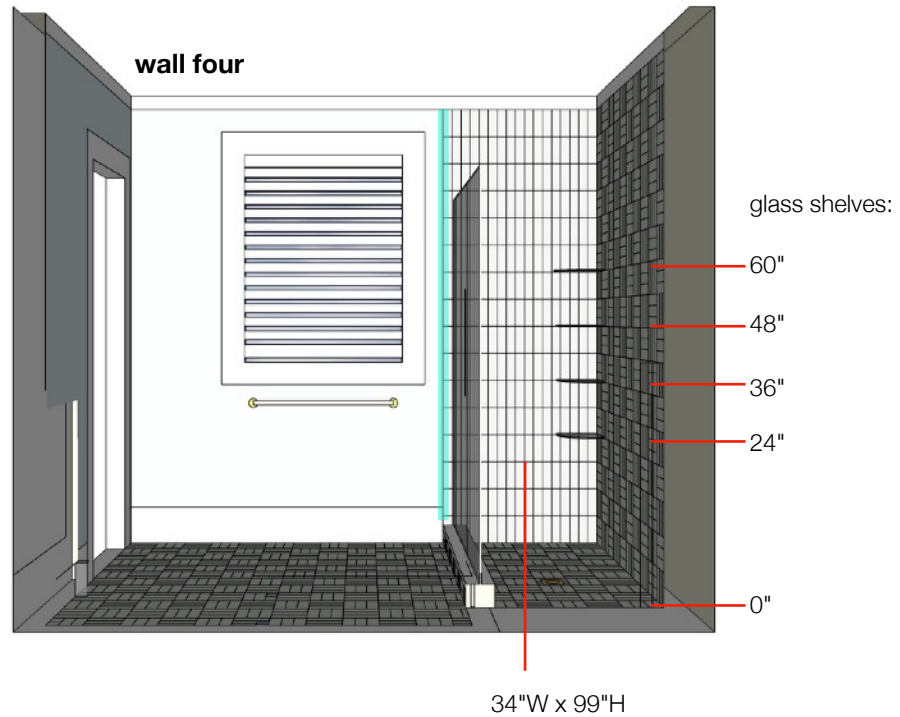

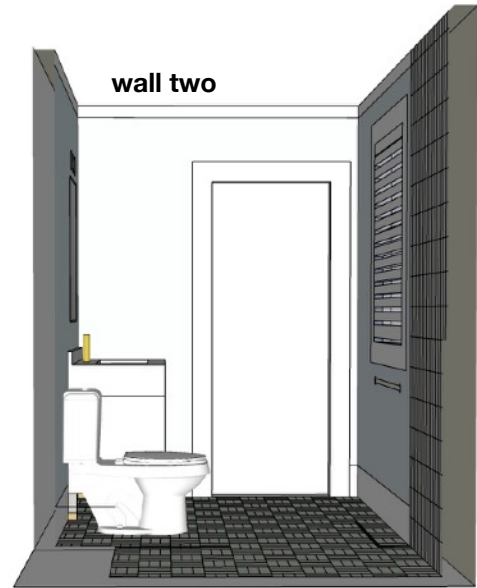

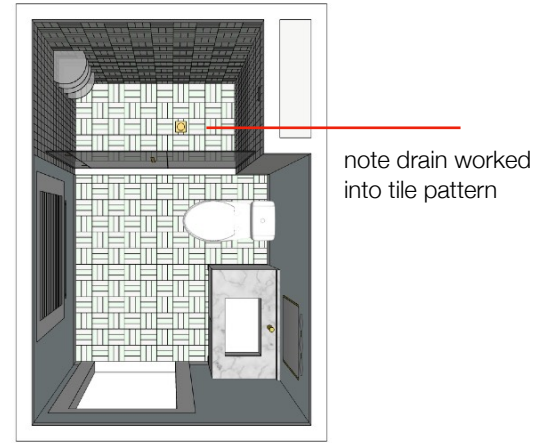

4" schluter drain  
floral brushed vintage gold  
(RBW purchase)

(4) 9" glass shelves

# TILE

note how floor pattern continues up to the front of the curb, and same in the rear. Topped with .75" curb top.

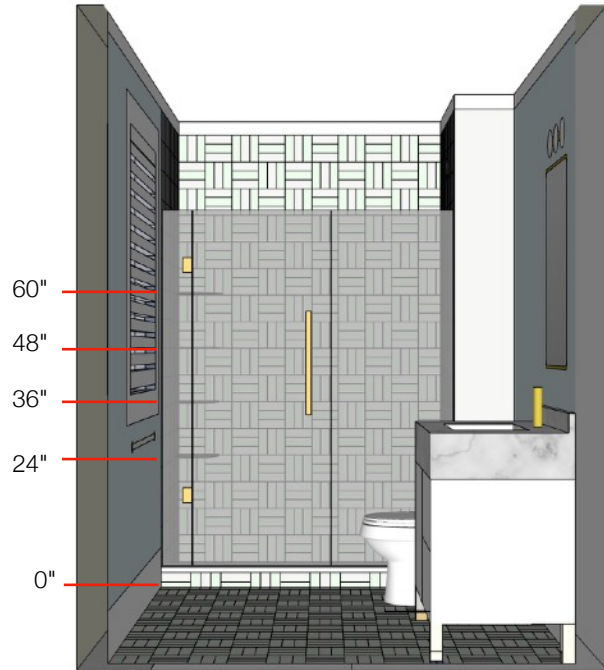

blue lines show tile with glazed edge for finishing

**TILE: shelves and [fireclaytile.com](http://fireclaytile.com)**

(4) 9" glass shelves

Install four glass shelves with tile.  
12" apart in corner.

Below are Fireclay installation notes from my rep [terapan@fireclaytile.com](mailto:terapan@fireclaytile.com)  
The website has lots of tips on installing this type of handcut tile

Of note, since I see you are suggesting a parquet design with the 2x6 tiles  
Please keep in mind when blending sizes that our ceramic tiles are not modular as they are handmade & hand-cut. Slight grout irregularity is to be expected when blending different sizes— a larger grout joint is more forgiving, while a tighter grout joint will accentuate the nominal size variance

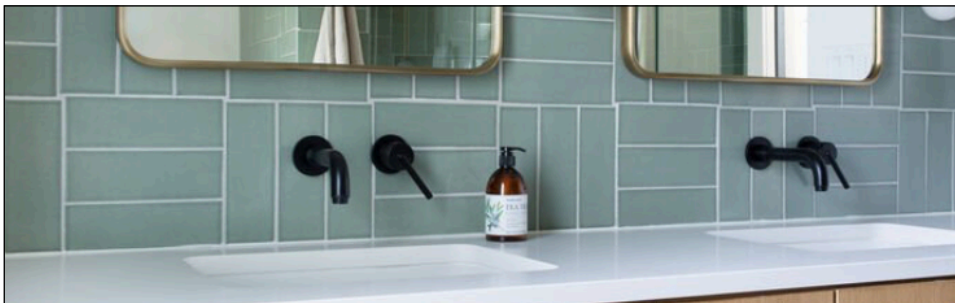

Here is the approx size of the 2x6

2 x 6	1-15/16" x 6"
-------	---------------

We typically recommend using SANDED grout for our handmade ceramic tiles

For sealer—

I typically recommend [Miracle Cover](#) – Our Creative Director raves about it & says the

Don't want parquet to look like this.  
Discuss grout line prior to install

# VANITY

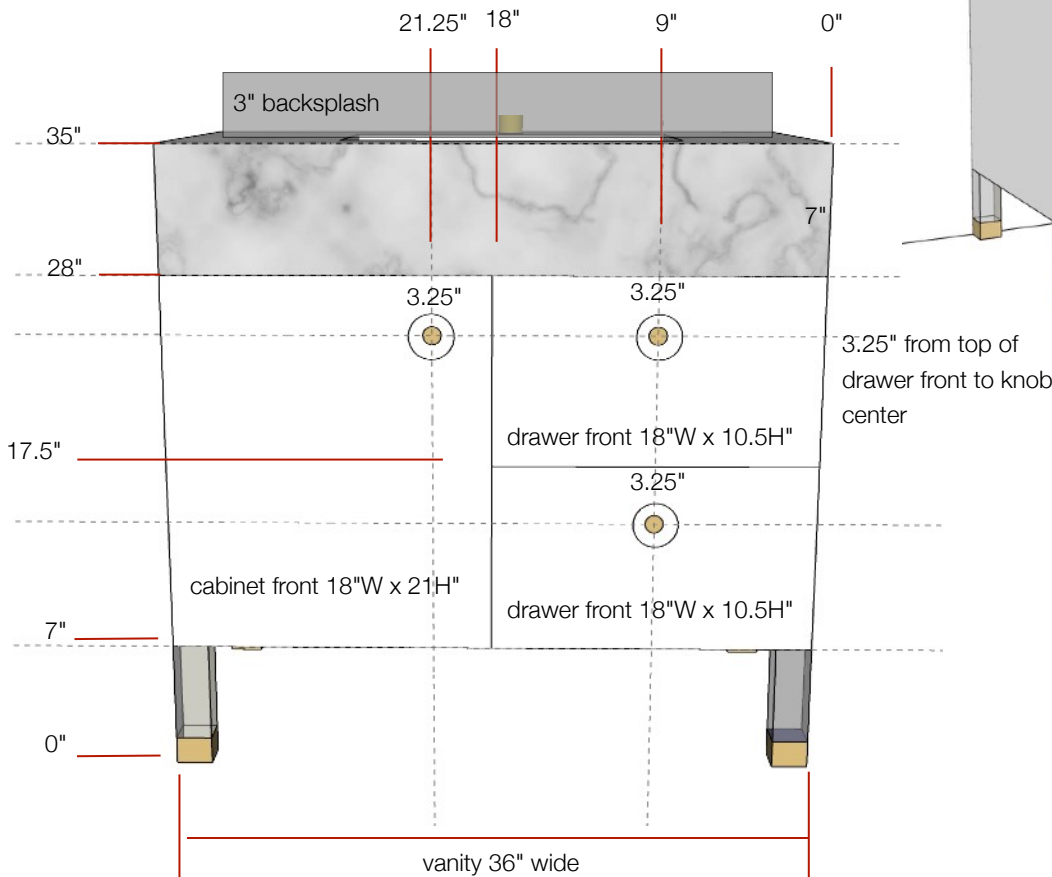

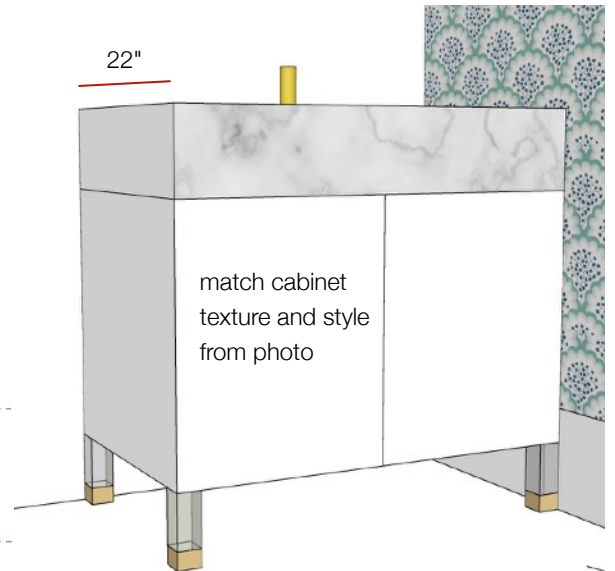

custom made medicine cabinet, being built by <https://modshop1.com>

base only, quartz counter will be ordered on site
